GETTING STARTED WITH BLACKBOARD MOBILE

Blackboard mobile is an effort to bring teaching, learning and campus experience to a mobile device. It allows students and teachers to access teaching and learning through a two-way interaction. It allows you to access assignments, grades and discussions and much more with Blackboard Mobile Learn app. This app works for all iOS and Android devices.

To access Blackboard Mobile:

To download the app, search for "Blackboard Mobile Learn" on apple store or Google Play Store for Android.

To use the Blackboard Learn app, you will be prompted to subscribe to the app through one of the options-
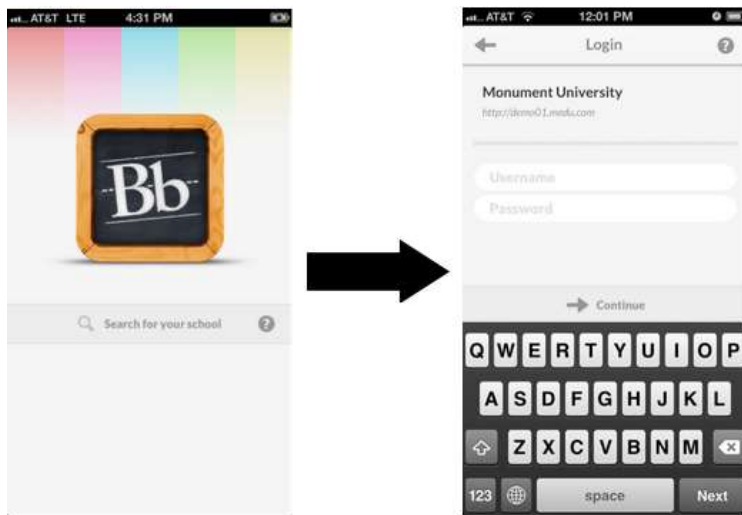

- $1.99 for 1 year of access
- $5.99 for unlimited access

Note: If you school has purchased this app. You could access the app without paying any fee.

Logging in with Blackboard Learn:

Open the app and search for your institution and login with school's credentials.

You can login to one school at one time. So if you need to access another school log out of one and select another.

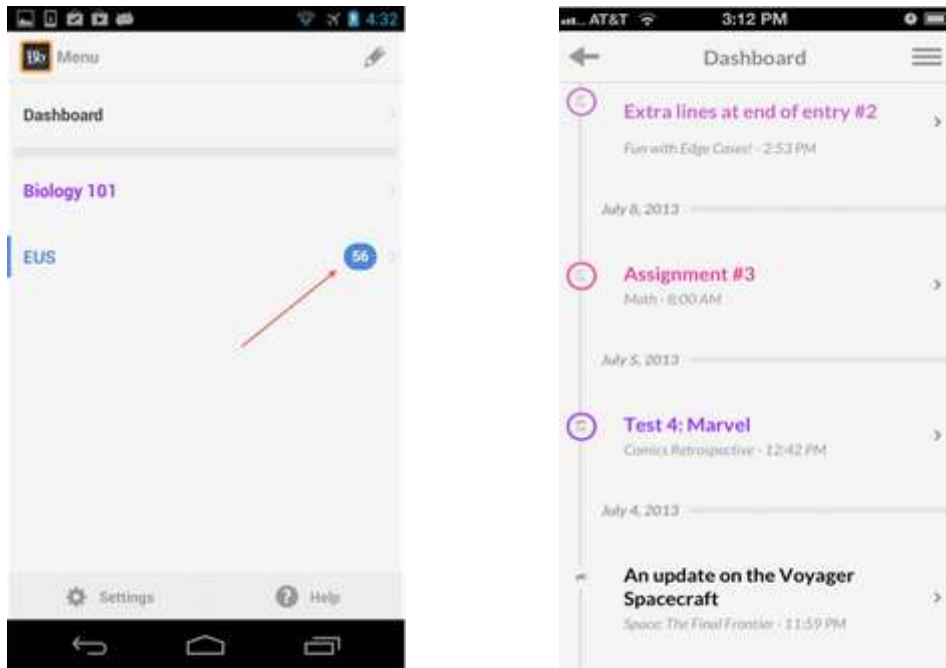

Dashboard:

View your dashboard for new updates and organization activity, including Announcements, content items, grades, Assessments and discussions.

The highlighted count net to the course indicates new activity in your courses and organization. This feature is not supported by iOS currently and will be coming very soon.

GETTING STARTED WITH BLACKBOARD MOBILE

The dashboard feed is chronologically listed and color coded by class and organization and each activity item is accompanied by a related tool icon.

Viewing content on Blackboard Learn:

Mobile learn is designed to run multiple types of content on the mobile device such as text document, presentations, and audio/video files.

To view the images you could either click on the file link or cropped image below the file link. For iOS if you click on the image below the file link, you will have the option to save the file link on your mobile device.
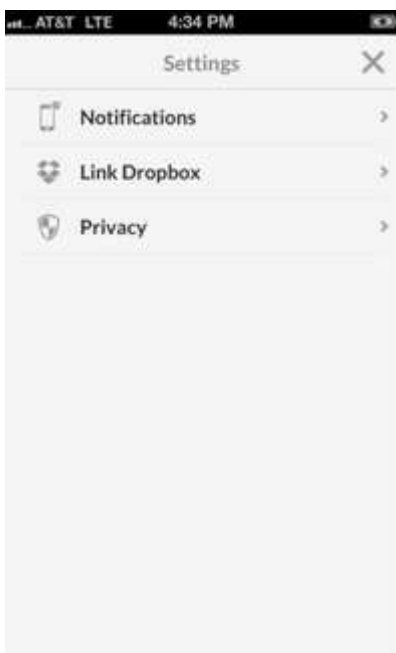

Taking Mobile tests:

Tests are only compatible when they contain supported question types. If your tests are not formatted with one the compatible question types, you'll need to take the test on a web browser.

Settings:

You could also change your privacy settings, push notification preferences and drop box account linking according to your own need.

You could link your Dropbox account to your mobile Learn app so that you could attach files easily through your phone.

Select "Dropbox" and you will be redirected to Dropbox sign-in page.

GETTING STARTED WITH BLACKBOARD MOBILE

Enter with your Dropbox credentials and you will be redirected to back into the app and an alert message will display confirming that your Dropbox was linked successfully.
